<b>Size of Dog</b>	<b>Bath &amp; Blow Dry FFBGA &amp; Tidy Up Only</b>	<b>REGULAR 2-3 monthly Tipping/Carding/CK &amp; Rolling Coats</b>	<b>COMPLETE/TOTAL HANDSTRIPS Or Abundant Coats / Knotty &amp; Neglected Coats/ Difficult Dogs / Medical Conditions</b>

-  Handstripping is beneficial and preferable for some breeds and coat types. It improves the quality, texture and colour intensity of the coat. Clipping harsh coated handstrip coats can have a detrimental effect and make the coat grow back softer, silkier, thicker, woollier and paler in colour
-  Handstripping can only be done if the coat is ready to be pulled out and is of the correct texture
-  Handstripped dogs may often go bald if there is not a new coat or undercoat beneath the old, dead hair. They often look a lot worse until their new coat grows in (about 3 – 6 weeks later!)
-  Neutering or any previous clipping may alter the texture and growth of the coat, thereby rendering it too soft to handstrip. Please refer to Section 7 for quotes.
-  Any dogs that find handstripping painful or distressing (i.e. some obese dogs) will not be done. The welfare of our clients is paramount and they will need to be returned when the coat is ready. Alternatively, they may need to be clipped instead in future.
-  Prices vary according to the size of the dog, the amount of coat to come out (a thick dense coat will take longer than thin, sparse coats), the ease with which the coat comes out and the amount of styling required.
